

Overview

Scout Scientific LLC is an independent analytical R&D laboratory specializing in high-precision small molecule testing and method development. Led by Shawn Wyatt, a chemist with over 25 years of senior-level industry experience, we offer agile, expert-led analytical support designed to bridge the gap between early discovery and market-ready prototypes. Our mission is to provide the pharmaceutical and chemical sectors with a high-integrity, low-overhead alternative to large-scale contract organizations.

Core Capabilities

- **Method Development & Optimization:** Custom HPLC design and troubleshooting for novel compounds and complex mixtures.
- **Scientific Investigation:** Expert method and sample investigations to resolve product issues and analytical hurdles.
- **Stability & Feasibility Testing:** Early-phase R&D stability assessments to support rapid decision-making in discovery.

Technical Infrastructure

- **Instrumentation:** Waters Alliance HPLC System with PDA (UV) and QDa (MS) detection.
- **Data Integrity:** Fully licensed Waters Empower 3 software with full system audit trails enabled for all analytical runs.
- **Laboratory Support:** Analytical balances, moisture analysis (Karl Fischer), and dissolution apparatus.

Business Information

- Cage Code: 8JRY1
- DUNS Number: 117435118
- UEI: XJKMNET1K235
- SIC: 8734
- NAICS: 541380, 541715
